CHECKLIST

Fire door compliance checklist for your home

- [ ] Identify whether your property has three or more storeys or an integral garage
- [ ] Check existing fire doors for certification labels on the door edge
- [ ] Inspect intumescent strips for damage, gaps or paint sealing them to the frame
- [ ] Test that each fire door closes fully from any position without obstruction
- [ ] Tighten loose hinge screws and replace any damaged hardware with certified components
- [ ] Remove wedges or hooks propping fire doors open unless they are electromagnetic holders
- [ ] Consult building control before replacing or removing any fire door installed as part of a previous approval
- [ ] Mask or remove intumescent strips before painting to prevent them being glued in place
